

A dark, moody photograph of a bathroom interior. In the foreground, a white bathtub is partially visible. Behind it, a walk-in shower with glass doors is illuminated from within, casting a warm glow. A single blue towel hangs from a chrome towel rack. To the left, a white door with a glass panel is slightly ajar. Through the glass, a snowy outdoor scene with a house and trees is visible, suggesting a cold, relaxing atmosphere.

DE-STRESS

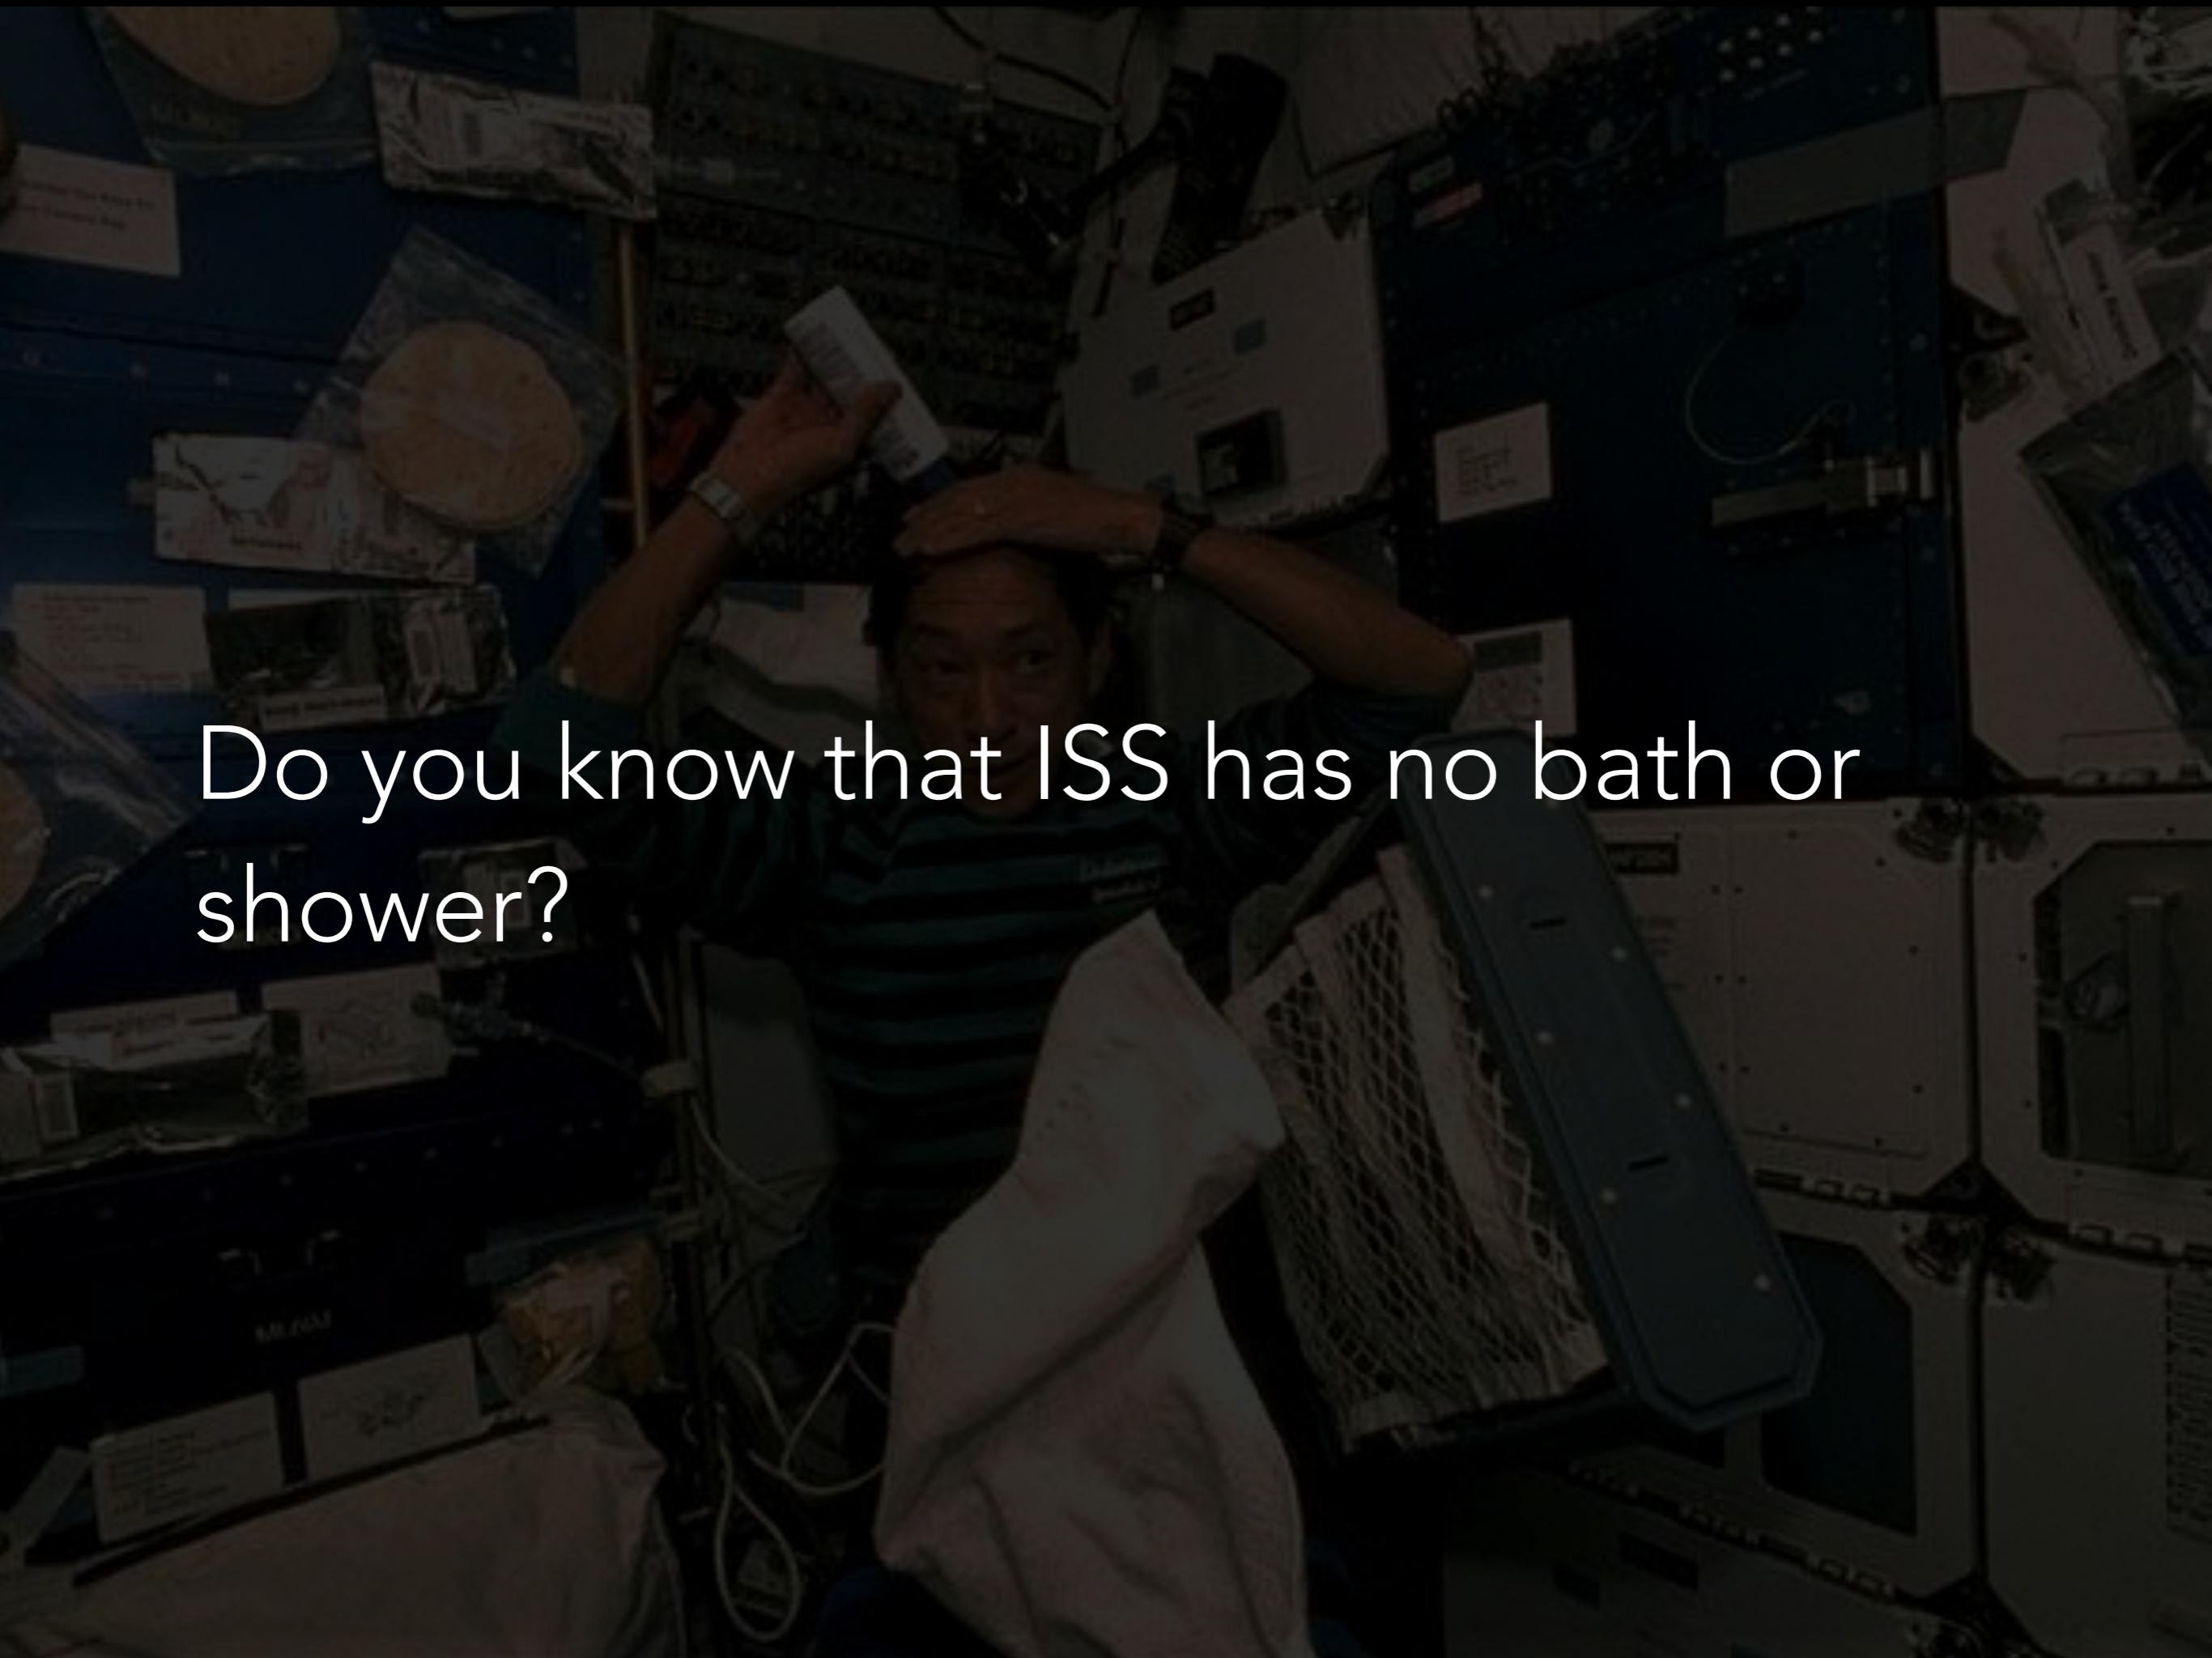

WEARABLE BATH

A photograph of the International Space Station (ISS) from an external perspective. The station's white truss structure and solar panels are visible against the dark void of space. In the background, the Earth's atmosphere is visible as a thin blue line, with clouds and landmasses below.

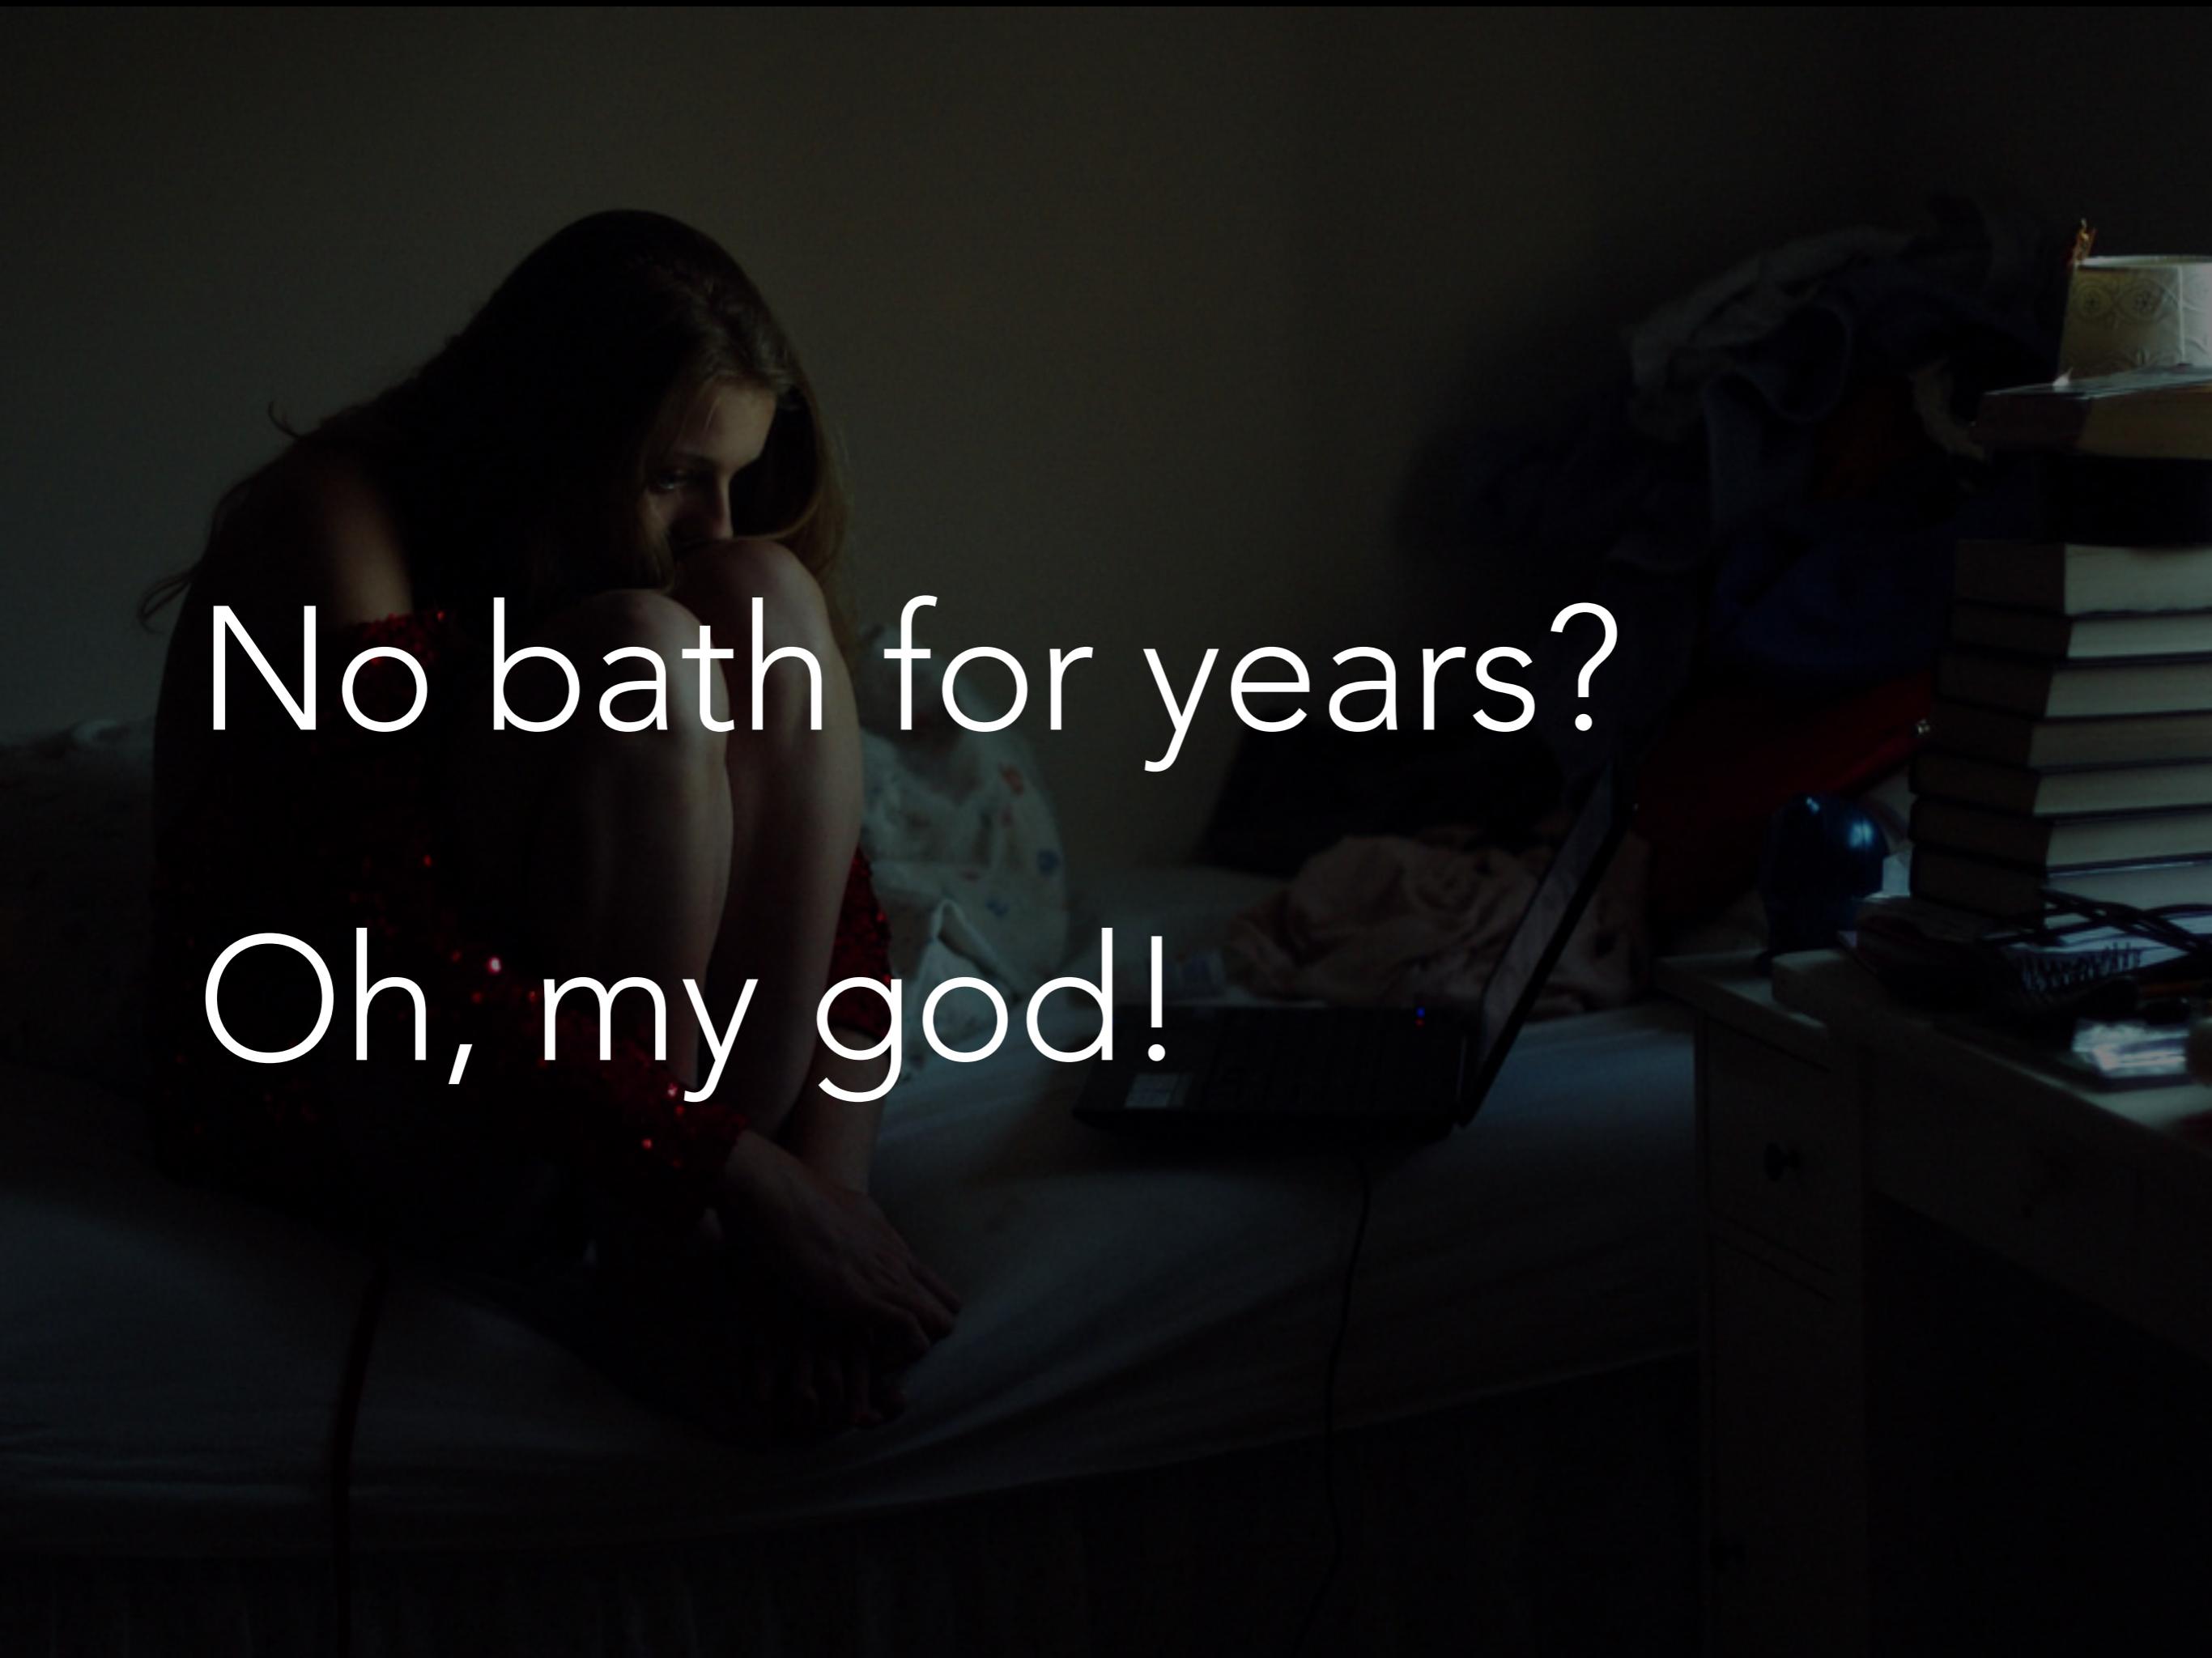

Imagine you stay in ISS or go to Mars by rocket

It will take a half year, one year, or more..

A photograph of a person in a white space suit floating in the International Space Station. The person is wearing a striped shirt underneath the suit. The background shows the dark void of space with stars and parts of the station's equipment.

Do you know that ISS has no bath or shower?

A woman with long brown hair is sitting in a dark room, looking down at a stack of books on a shelf. She is wearing a red patterned dress. The room is dimly lit, with a small blue glowing object on the shelf to her right.

No bath for years?

Oh, my god!

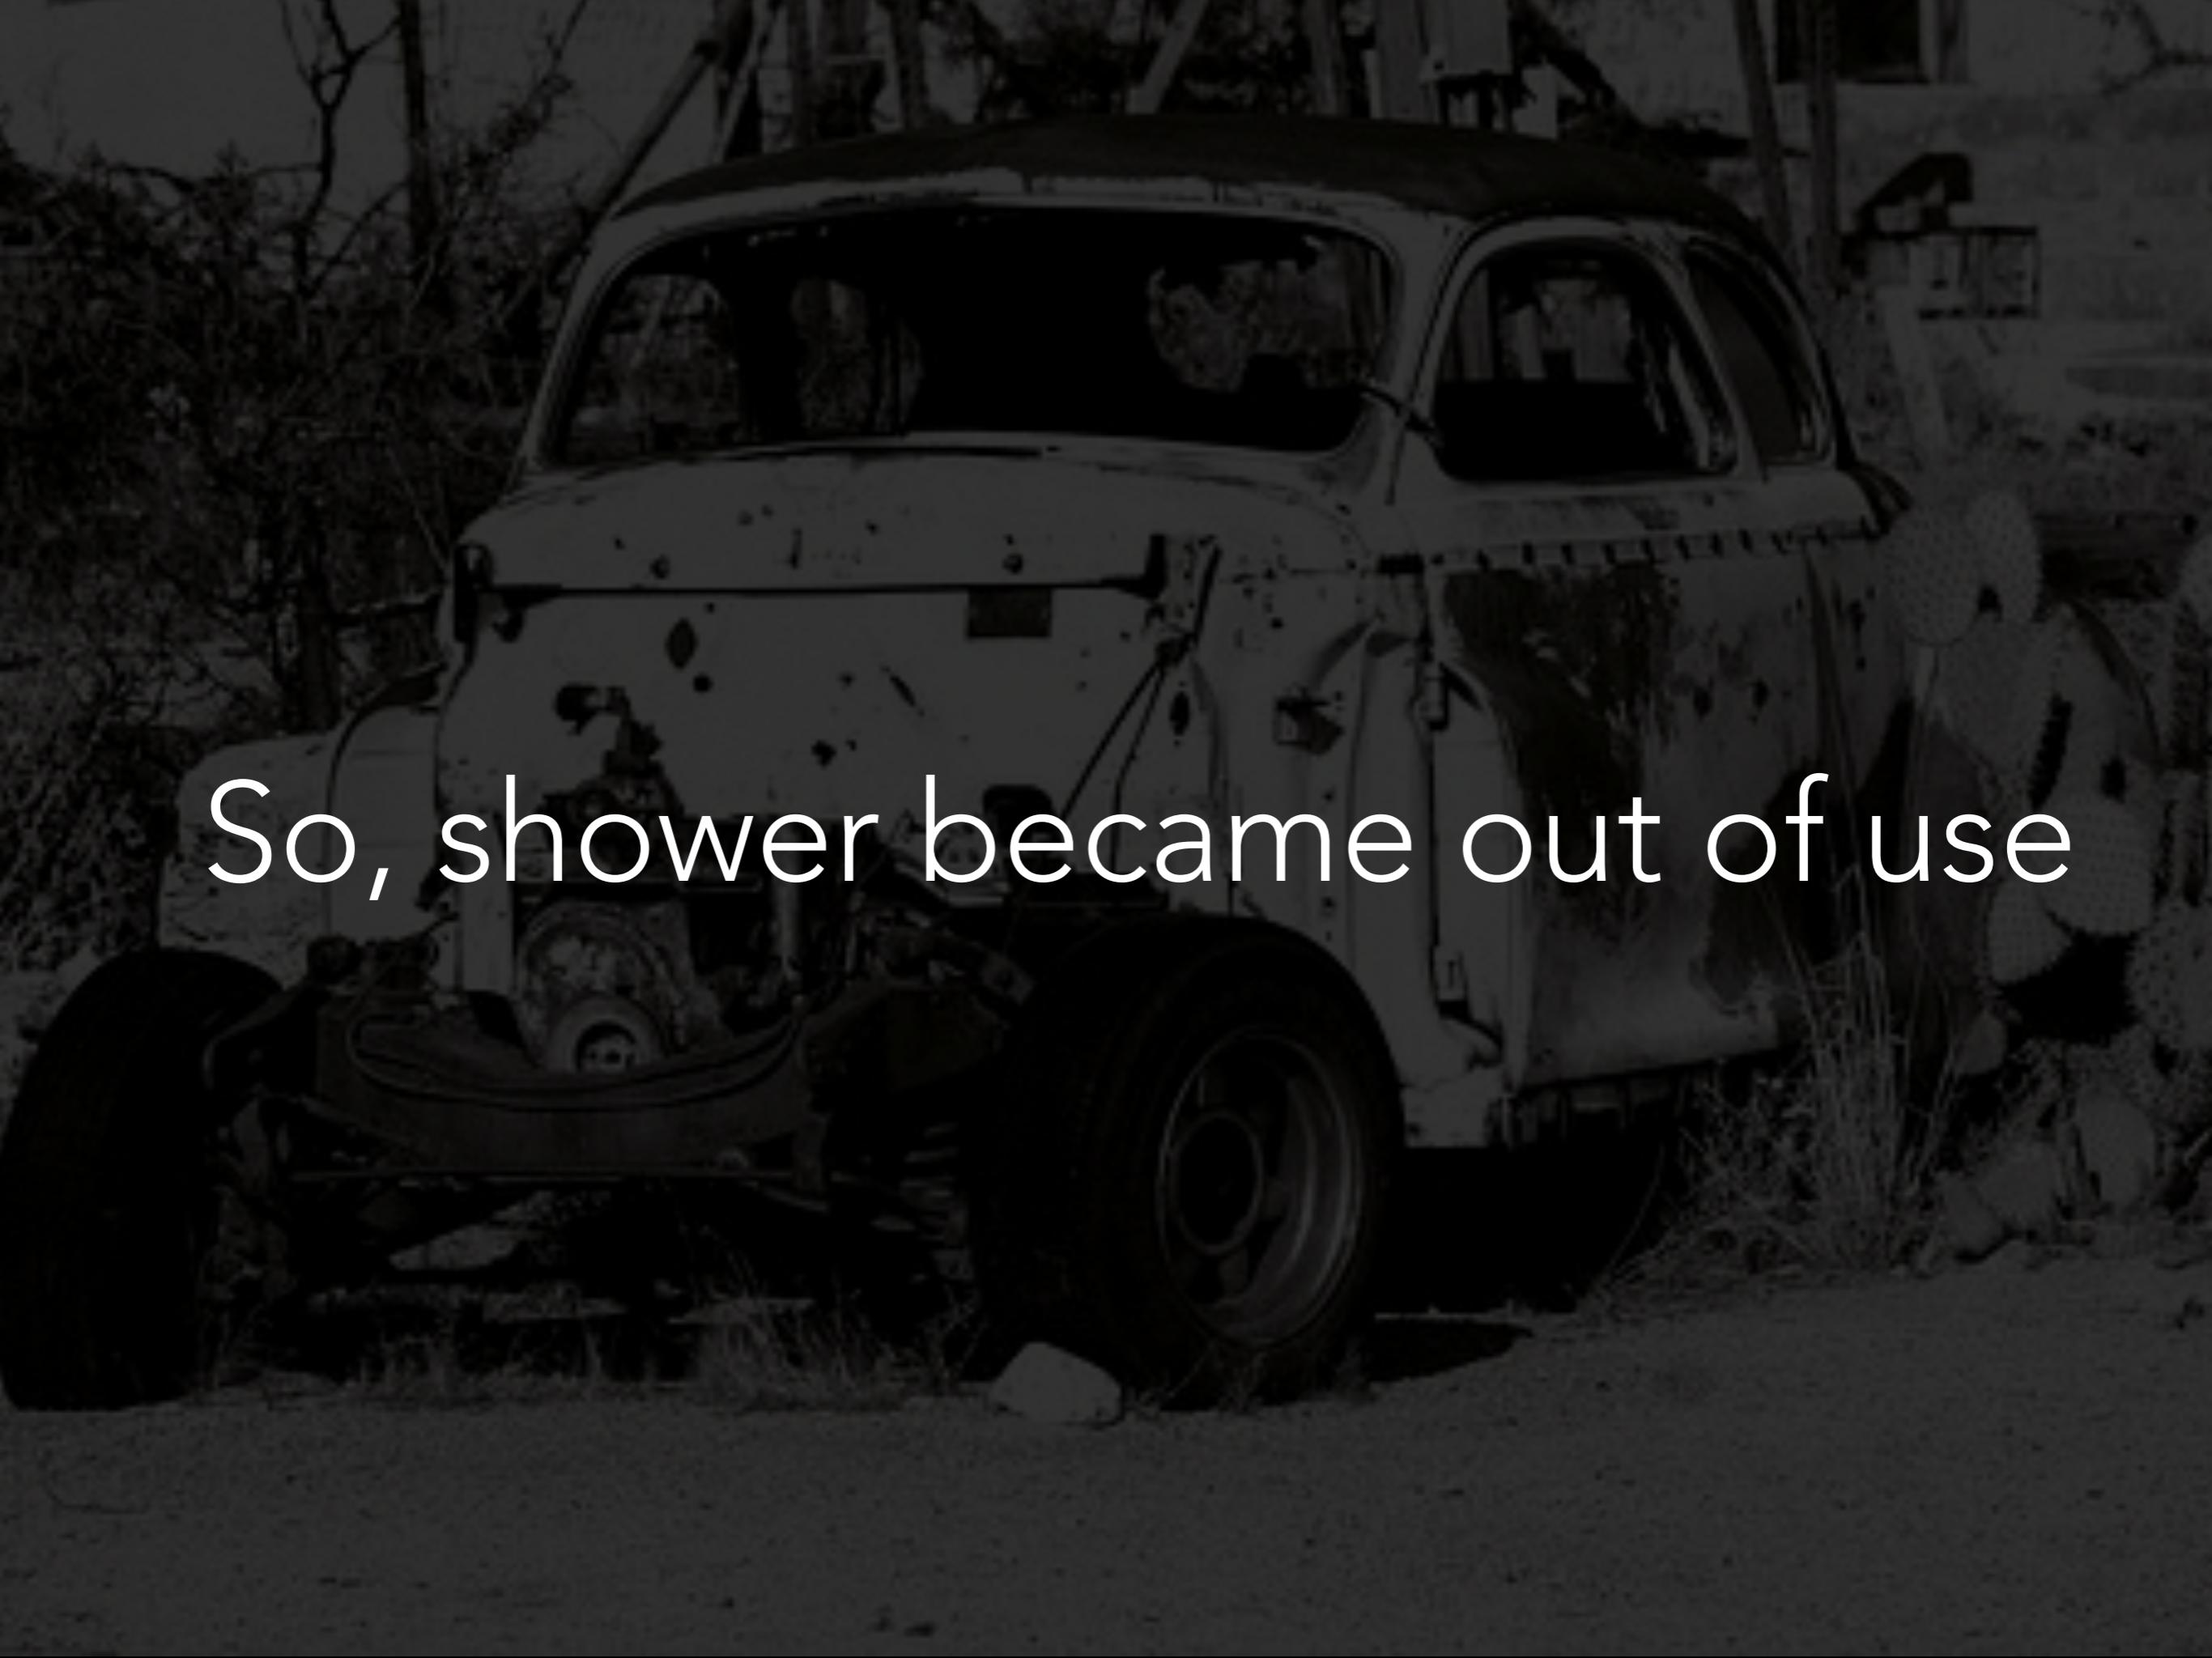

Why no bath or shower???

**Good feeling
by bath**

**Hard work for
wiping splash**

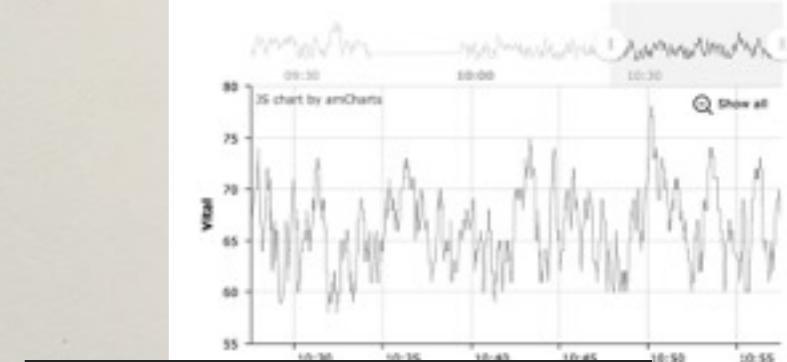

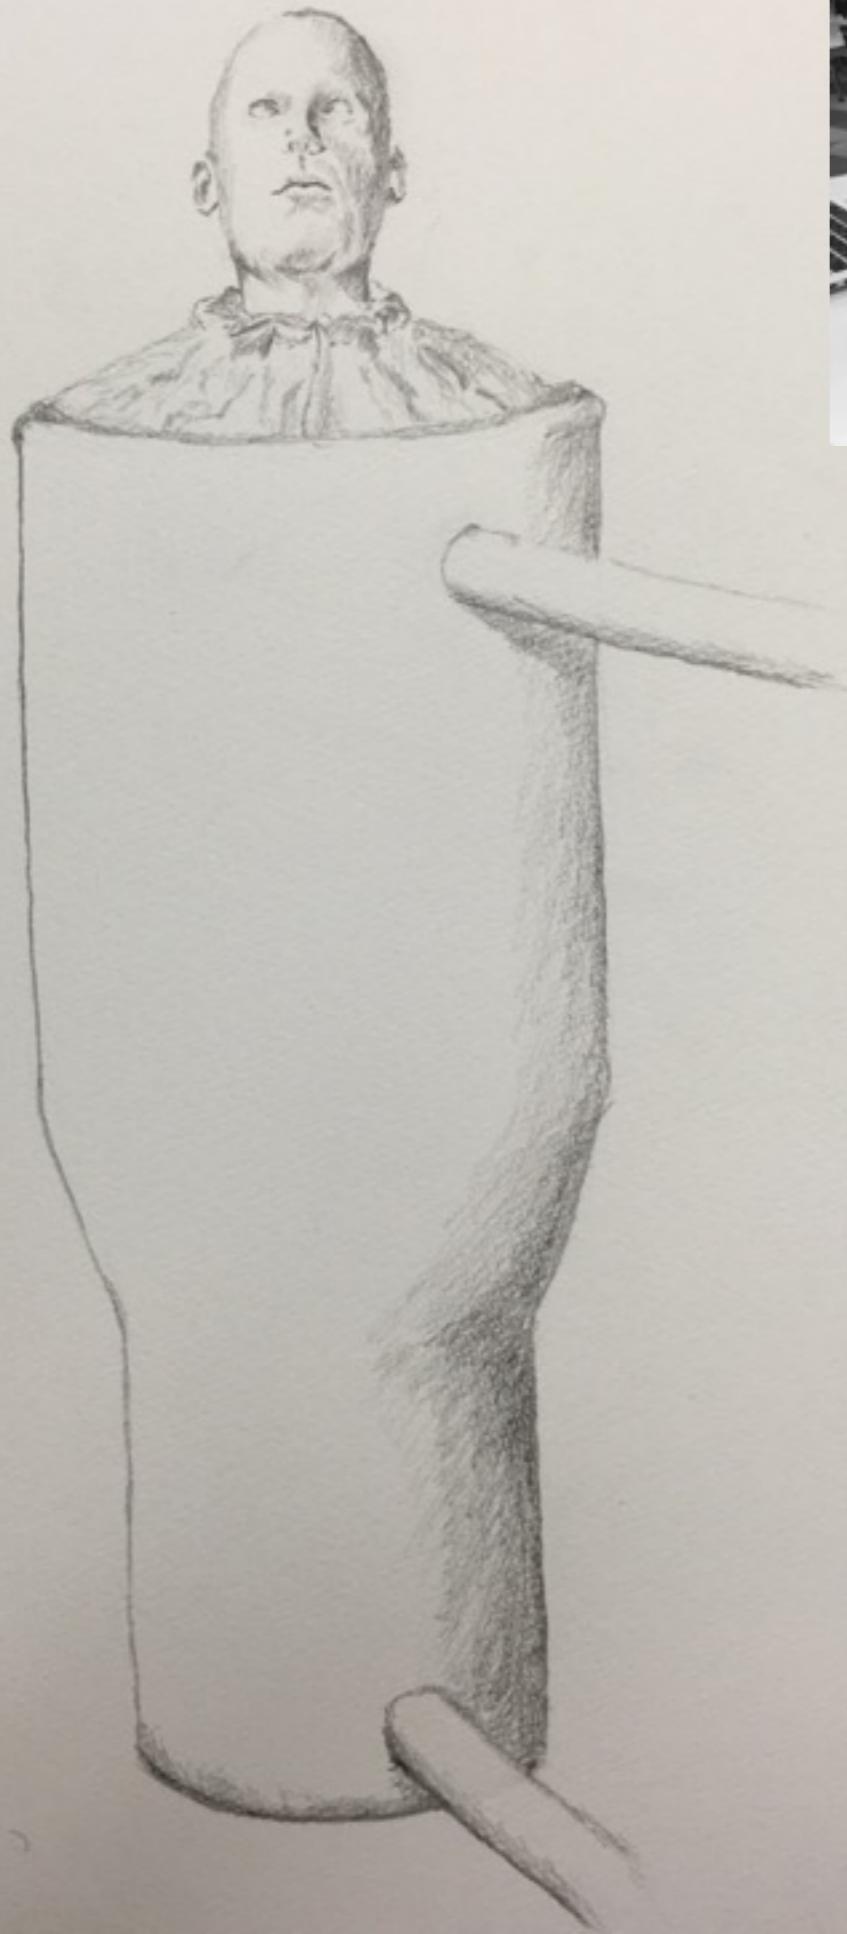

A black and white photograph of a white pickup truck. The truck has significant mud splatters on its front half and rear side. The front left tire is completely flat, resting on the ground. The truck is parked on a dirt surface, and there are some bare trees in the background.

So, shower became out of use

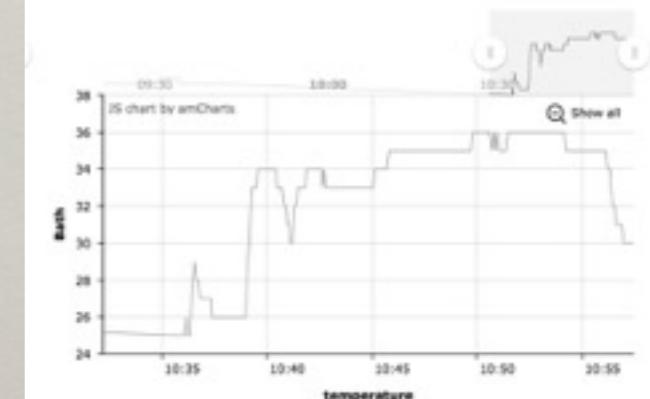

A dark, semi-transparent background image of a person in a space suit. The suit is light-colored with darker stripes on the arms and legs. A prominent circular patch is visible on the upper left shoulder area. The person's head is turned slightly to the right.

**Our team “de-stress” solve “Rock-It
Space Fashion and Design” to care
astronauts/cosmonauts physical and
mental health**

Rock-IT Space Fashion and Design

Bath

Feature

- Full body (below neck) in reality, but for the hackathon we developed a bath for leg and hand.
- Vital sensing for notifying when you finish soaking
- Camera based hands-free UI for controlling bath related things (temperature and fan).
- Almost no splash on the body after soaking in a bath!!!
- No splash on the wall, so no wipe needed!!!

Refreshment
for the crews
